## CAREER PROFILE:

Passionate and results-driven Python-GenAI Developer with 5+ years of experience in Python, GenAI, Machine Learning, Deep Learning, and modern software development practices. Driven to build and lead impactful projects, delivering meaningful results through the AI and Data Science field.

- Designed and implemented the complete pipeline for extraction of text, tables and metadata from RTF, DOCX, and PDF files using **Docling f/w** & integrating **vision models** like (PaddleOCR, Tesseract etc) with Amazon Bedrock LLMs, from POC (R&D) to implementation, streamlining data extraction and target ingestion, for Life Sciences GenAI application.
- Built end to end Extraction strategy for a GenAI application using **Docling** Framework improving Accuracy, Speed, and reducing multiple dependencies on other libraries.
- Responsible in delivering new features and solving prod issues related to Python-GenAI Application, addressing text extraction, table population, font issues through robust Python logics and NLP techniques and deploy code fixes through **Kubeflow** pipelines.
- Built and optimized a custom **RAG pipeline** using **Lang-Chain**, incorporating advance chunking strategies (recursive, semantic, agentic and document-specific) for efficient context management. Implemented retrieval optimization and evaluated performance using **RAGAS** to ensure high accuracy and relevance across diverse query sets.
- Developed **agentic AI** solutions using **Langgraph** and **CrewAI**, designing autonomous multi-agent workflows and applying design patterns to improve process efficiency and decision-making process for Life Science EDM application.
- Utilized **AWS GenAI (Bedrock, Textract, OpenSearch)** to automate extraction and generate concise summaries from complex medical reports.
- Used **NLP techniques** and Deep learning architectures to enhance project features and solutions, improving extraction efficiency in the application.
- Developed customized AI agents using **Microsoft Copilot Studio**, integrating seamlessly with **Power Platform, Dynamics 365, and Azure AI** to enhance automation and business intelligence capabilities.
- Hands On experience in all **Machine Learning Algorithms** - Gradient Descents, Linear Regression, **USL** & **RL** using Sci-Py, Sci-Kit and Matplotlib Libraries.
- Modularized Python OR Repos built using **PuLp, Pyomo and Gurobi** Libs to obtain faster outputs using advanced Python OOPs approach for obtaining Optimal Cost Solutions.
- Experienced in leveraging **Databricks** for end-to-end data engineering and analytics workflows, with strong cloud expertise across AWS (S3, EC2, Lambda, CloudFormation, etc.) and Azure platforms, including migration, optimization, and seamless integration of data pipelines and Delta architectures.
- Very good **communication** and experience in collaborating with cross functional teams for resolving any dependencies.

## TECHNICAL SKILLS:

- **Programming Language** : Python
- **Frameworks** : Docling, LangChain, LangGraph, CrewAI, MCP
- **ML-DL & NLP** : NLP Techniques, ML Algorithms & DL Architectures
- **AI & LLM's** : CoPilotStudio, AWS Bedrock, HuggingFace Hub
- **Data & Cloud Platforms** : Databricks Advance, Azure and AWS
- **Database Management** : MySQL, Couchbase
- **Version Control & CI/CD** : GitHub, Azure DevOps

## WORK EXPERIENCE:

### 3) CONSULTANT, Deloitte US, Bengaluru

4<sup>th</sup> December 2023 – Present

**Technologies** – Python, Docstring, LangChain, Langgraph, MCP, CrewAI, NLP, AWS Bedrock, GitHub.

**Tools** : VScode, Kubeflow, AWS, Azure, pdfPlumber, pypdf,

### 2) DATA ENGINEER, LTI-Mindtree, Bengaluru

30<sup>th</sup> July 2021 -29<sup>th</sup> September 2023, CITI Bank - ASW

**Technologies** – Spark (Core, SQL, Streaming), Python, AWS, Couchbase DB, Jenkins, Linux, Databricks ML Platform.

**Tools**: Bit-Bucket, Anaconda, Databricks Cloud Platform, Jupyter Notebook, Confluence, Jira.

### 1) SOFTWARE ENGINEER, Wipro Ltd, Bengaluru

26th November 2018 -- 7th April 2020, Ericsson – PMIC

## PROJECTS:

1. **Multi-Agent RAG Solution for Enterprise Document Management:** Help enterprise employees retrieve, summarize, and validate information from a large and diverse internal document repository.
2. **GenAI - Cold Email Generator:** Cold email Generation for providing Software Services based on Client.
3. **Supply Chain Optimization:** Created a LP Model for with right Data Feeding strategy for efficient functioning of retail products using Python, Pyvis, PuLp libraries.
4. **Customer Churn Prediction:** Predicting Customer Churn using Gradient Boosting & ANN Models.

## CERTIFICATIONS:

1. Microsoft Certified Azure Data Scientist Associate.
2. Deloitte Certified Agentic AI Specialist.
3. Deloitte Certified GenAI Developer Associate.
4. Advanced Prompt Engineer Badged.
5. Deloitte certfd “Microsoft CoPilot Studio”.

## EDUCATION DETAILS:

| YEAR OF PASSING | QUALIFICATION           | INSTITUTION                                   |
|-----------------|-------------------------|---|
| 2018            | Bachelor of Engineering | CMR Institute of Technology - VTU Bangalore   |
| 2014            | 12th                    | St. Joseph's Pre-University College Bangalore |
| 2012            | 10th                    | Citizens High School Bangalore                |

I, Pramod.D.M here by confirm that the information given above is true to the best of my knowledge.
